Arvind Acharya

+91 8217249312 | arvindacharya2000@gmail.com | linkedin | Bengaluru, India

SKILLS

Languages & Programming: Python, SQL, JavaScript, C++, Java
Frameworks & Platforms: C3.AI, Databricks, Azure, Copilot Studio, Thunk.AI, Snowflake, Denodo, Docker, Git, React, Power BI, Power Automate, PowerApps, Aha! Product Management, VS Code, Cursor, Claude Code, Claude Design

EXPERIENCE

Technical Associate | GSK (GlaxoSmithKline) *Aug 2023 – Present · Bengaluru*

Enterprise AI - Solution Engineer

- Architected and deployed **ARIA**, an AI agent that automated multi-country employee reimbursements through Workday integration, OCR, and policy-based reasoning, reducing approval time from **10 days to 1 day (90% faster)**.
- Scaled **ARIA** to production as the sole engineer, supporting **4 countries** and processing **4,000+ reimbursement requests per month** via GSK's internal AI platform.
- Identified a production defect on a **live,** high-criticality demand forecasting application - traced the root cause and shipped a fix now used **300+ times a month** across a 12-person planning team, **eliminating a recurring manual** engineering hand-off
- Maintained infrastructure for GSK's **C3.ai** agentic AI platform, delivering 12 platform upgrades across cluster, environment, and application layers with **0 unplanned downtime**.
- Owned end-to-end delivery of **15+** full-stack features across two production applications using Copilot Studio and C3 Model Context Protocol (MCP), completing a **10-week roadmap in just 3 weeks** (**70% faster**).
- Containerized the C3.ai development workflow using Docker and CI/CD pipelines, standardizing development across Windows and macOS, **reducing onboarding time by ~75%**, and eliminating cross-platform environment inconsistencies for 10+ engineers.

R&D Tech - Data Engineer

- Built an LLM-powered data classification pipeline in Databricks to identify PII/PHI across ~75-column clinical datasets, automatically generating three role-based dataset variants, reducing processing time from **~15 minutes to under 10 seconds** per file while improving classification **accuracy from 65% to 98%**.
- Built a multi-layer pipeline that moved **2M+** vendor records from Databricks to Denodo, providing standardized datasets for 4 business teams; also **reduced pipeline runtime by 30%** through Delta optimization and partition pruning.
- Engineered a high-throughput ETL pipeline processing **200K+ daily events** into Snowflake, integrating automated distribution monitoring that **reduced anomaly detection time by 50%** and improved pipeline reliability.
- Built a Python-based data consolidation and report generation solution that **reduced processing time from 2 hours to under 1 minute (99% faster)** while eliminating recurring manual reporting tasks across the department.
- Led automation of the R&D investment allocation process, **reducing data quality issues to 0**, and implemented semantic similarity analysis using HuggingFace sentence-transformer embeddings to identify overlapping initiatives, resulting in **4 proposal restructures**.
- Independently built a portfolio health dashboard adopted by all product owners and directors in the department, reducing a monthly reporting process from **1 day to under 30 seconds** through Power BI, Power Automate, and Aha! integration.
- Designed and delivered an automated travel spend-tracking application integrating Concur expense data, replacing Excel-based reporting, **eliminating data quality issues** and **doubling budget forecasting accuracy** for senior stakeholders.

PROJECT

Combat24 | *Independent Full-Stack Developer* *combat24.in*

- Identified poor lead generation as the core business problem, then rebuilt the website using Claude Design and Claude Code with an SEO-first approach, increasing organic enquiries from **1–2 to ~10 per week (5x)**.
- Designed and built a full-stack membership management platform with a member app, admin portal, and QR-based access system, **replacing third-party software** and supporting daily operations for **200+ members**.

EDUCATION

BTech, Computer Science and Engineering | Ramaiah University of Applied Sciences *Jul 2019 – May 2023*
CGPA: 8.7 *Bengaluru*
